Westcon AWS Database Starter Kit

Starter Kit Overview

- 1 x Managed Database Server (MySQL, MSSQL, PostgreSQL, Maria)
- Choose from 3 database server sizes:
  - Small: 2vCPU's, 4GB RAM, 50GB
  - Medium: 2vCPU's, 8GB RAM, 50GB
  - Large: 4vCPU's, 16GB RAM, 50GB

- Pre-configured host-based firewall to allow connection on the database
- Deployable in existing networks in AWS or new networks (Network Starter Kit)

When to use this Starter Kit

- A customer requires a new database
- When you don't want to manage database servers
- Utilizes your current knowledge on databases

Why you need this bundle

- Easy to deploy on existing networks or new networks
- Standardized way to deploy databases in AWS
- Utilizes your current knowledge on databases
- Predictable Cost

Server Placement

Public Subnet
- Not recommended to place your databases in public subnets.

NAT Subnet
Not recommended but if your database needs access to the internet this is where you should deploy it

Private Subnet
In the private subnets you will place:
- Database Servers
- Servers that do not need any internet exposure

How do you deploy the Starter Kit for your customers?

- Our team of AWS experts is always available to provide support and assistance. You can rely on Westcon's expertise and experience to deliver your customers a secure, high-performance, and cost-effective AWS infrastructure.
