

Westcon AWS Veritas Backup Starter Kit

Price starting from US\$75/month + Veritas licensing

Back up your customers M365 environment on AWS S3 with Veritas

Where are your customers backing up their M365 environment?
Are they putting all their data eggs in the one vendor basket?

Back up your customers Exchange, OneDrive, SharePoint, Teams and other environments using Veritas Backup Exec into an AWS Secure Storage Solution (S3). With Backup Exec and S3, your data back-up solution can easily scale with your customers needs as they grow.

Starter Kit Overview

- 1x Compute Instance (t3a.large)
- 1x AWS Elastic IP
- 1 x S3 Bucket
- Veritas Backup Exec software base-pack
- Deployable in existing OR new AWS customer instances ([Network Starter Kit](#))

When to use this Starter Kit

- New Customers Migrating to AWS
- Storage Offload from on-premise to AWS
- Application Modernisation
- Establish Backup and Recovery capability into the Cloud

- Your AWS S3 will be added with additional securities encompassing storage security such as data loss prevention, scanning malware or malicious files uploaded or backed up in your Cloud storage.
- It employs AWS's native security features plus the Cloud market's best security solutions to make the storage impregnable.

How does it work?

AWS

Choose from a small, medium or large compute as well as storage requirement for the quote (the actual billing is based on consumption).

Use the [AWS pricing calculator](#) or contact us for help.

Veritas

Determine either the number of users or the number of VMs, Physical Appliances & Sites.

Use the [BackupExec Simple License Calculator](#) or contact us for help.

How do you deploy the Starter Kit for your customers?

- Our team of AWS experts is always available to provide support and assistance. You can rely on Westcon's expertise and experience to deliver your customers a secure, high-performance, and cost-effective AWS infrastructure.
