Westcon AWS WAF Starter Kit

Starter Kit Overview

- Protection against common application vulnerabilities or other unwanted traffic
- Protection from malicious traffic that increases resource consumption
- Protection from XSS attacks
- (Optional) Protection from bots and DDoS attacks
- (Optional) Protection from SQL Injection attacks
- Protection from PHP/WordPress attacks
- Centralised WAF logging and monitoring

When to use this Starter Kit

- A new customer just starting its journey on AWS and is building a web application.
- A customer is migrating a web application to AWS.
- A customer has a workload on AWS (ELB/API Gateway/CloudFront) that they want to secure from web-based attacks.

Why you need this bundle

- Easy to deploy
- Best practices included
- Ready to deploy artifacts
- Predictable Cost

How do you deploy the Starter Kit for your customers?

- Our team of AWS experts is always available to provide support and assistance. You can rely on Westcon's expertise and experience to deliver your customers a secure, high-performance, and cost-effective AWS infrastructure.
